krewSheet

A spreadsheet-style interface for Kintone records-enabling display and editing like Excel. Enter data with familiar, spreadsheet-like operations to collect data in Kintone seamlessly. Choose from two modes to fit your use case, making it easier to use Kintone in everyday work and improve efficiency

budget management app records in krewSheet

Simplify data entry

Spreadsheet-style usability

Edit your data in a familiar spreadsheet-style interface and view more data on a single screen.

Intuitive Designer

Create powerful views with ease—no coding required.

Flexible Layouts

Go beyond standard list views with cross-tab input and flexible row-and-column layouts.

A spreadsheet-style interface built for business applications

Deal Management

Customer Management

Budget Tracking

Inquiry Management

Task Management

Shift Scheduling

Choose from two layouts to fit your needs

Sheet Mode

Keep your list layout while enjoying the familiarity of a spreadsheet.

Use Cases

- Edit multiple records at once
- Easily identify stalled or high-priority projects
- Automatically calculate elapsed time since the last activity

- View and edit related records linked to parent records
- Check project history and assignee details in one place

Spreadsheet-Like Features

- Freeze rows and columns
- Formulas
- Conditional formatting
- Bulk record editing
- Copy & paste
- Filtering
- Aggregation with functions
- Sorting
- Export to Excel

Extend Kintone's capabilities

Search Panel

Table Editing / Related Records

View Sub Window

Xross Mode

Cross-tab Input & Layout Transformation
Transform your layout for more flexible data entry.

Use Cases

- View the overall budget status in a single screen
- Enter details while tracking totals
- Create custom subtotal calculations to fit your business needs

- View monthly schedules for all employees
- Balance staffing levels across shifts
- Create next month's schedule using a blank template

Three Powerful Features of Xross Mode

See the Big Picture While Entering Data

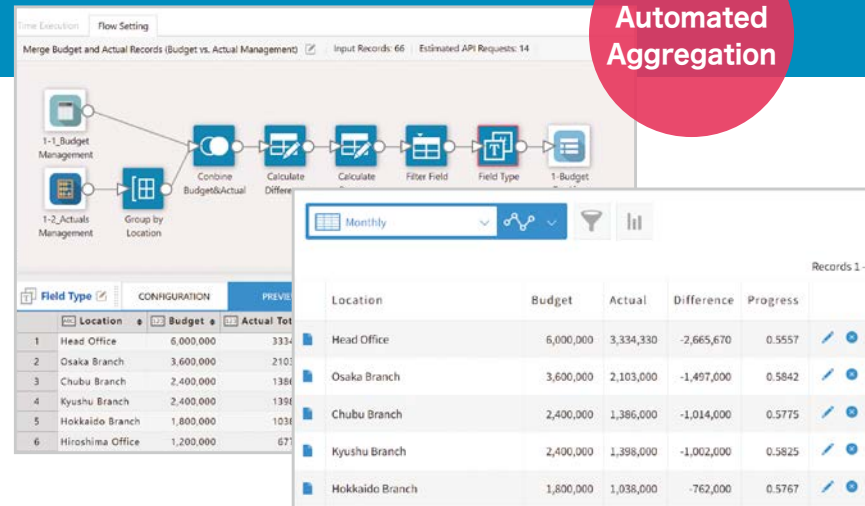

Insert Summary Rows and Calculate Freely

Add New Records Directly in the View

Direct Entry

Automated
Aggregation

A no-code data aggregation and transformation plug-in for Kintone. Combine and process data across multiple apps to create new business applications and workflows—without customization. Whether you need scheduled processing or real-time execution, krewData helps you automate data-driven operations across your organization.

Flow Setting: Merge Budget and Actual Records (Budget vs. Actual Management) Input Records: 66 Estimated API Requests: 14

Workflow: 1-1 Budget Management, 1-2 Actuals Management, Group by Location, Calculate Difference, Calculate, Filter Field, Field Type, 1-Budget

Location	Budget	Actual	Difference	Progress
Head Office	6,000,000	3,334,330	-2,665,670	0.5557
Osaka Branch	3,600,000	2,103,000	-1,497,000	0.5842
Chubu Branch	2,400,000	1,386,000	-1,014,000	0.5775
Kyushu Branch	2,400,000	1,398,000	-1,002,000	0.5825
Hokkaido Branch	1,800,000	1,038,000	-762,000	0.5767
Hiroshima Office	1,200,000	671,000	-529,000	

Two Ways to Run krewData

Scheduled Processing

Automatically Aggregate Data on Schedule

- Run hourly, daily, or monthly
- Select specific days of the week
- Run on the last day of the month

Use Cases

- Monthly budget reporting
- Month-end invoice generation
- Data cleansing and standardization

Best Fit For

- Predictable schedules
- Easy operational control
- Simple processing workflows

Real-Time Processing

Real-Time Data Aggregation Triggered by App Activity

- Webhooks for record creation and updates
- API-triggered execution
- Launch directly from krewSheet

Use Cases

- Automatic purchase order creation based on inventory levels
- Automatic invoice creation when orders are received
- Immediate updates when master data changes

Best Fit For

- Event-driven processes
- Real-time business operations
- Complex workflows

Automated Aggregation

Aggregate data across apps without coding.

Visual Workflow Builder

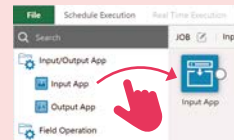

Build data processes visually with an intuitive drag-and-drop interface.

Execution Logs

Monitor and review processing results directly in Kintone.

1 Choose Source Apps

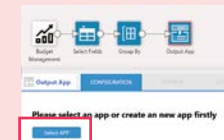

Choose the apps that contain the data to process.

2 Configure Processing Steps

Combine processing commands to aggregate and transform data.

3 Select Destination Apps

Choose where the processed data will be stored.

Use Cases

For Data Aggregation and Transformation

Budget App

Department	FY	Apr	May	Jun	Jul
Sales Dept. 1	2020	¥80	¥180	¥430	¥120
Sales Dept. 2	2020	¥40	¥90	¥220	¥90
Sales Dept. 3	2020	¥90	¥220	¥150	¥120

Combine Apps

Budget Tracking App

Department	Month	Budget	Actual
Sales Dept. 1	Apr	¥80	¥120
Sales Dept. 1	May	¥180	¥130
Sales Dept. 1	Jun	¥430	¥380
Sales Dept. 1	Jul	¥180	¥200
Sales Dept. 2	Apr	¥40	¥90
Sales Dept. 2	May	¥220	¥190

Actual Results App

Department	Date	Amount
Sales Dept. 1	2020/4/1	¥80
Sales Dept. 1	2020/4/7	¥40
Sales Dept. 2	2020/4/1	¥60
Sales Dept. 2	2020/4/3	¥30
Sales Dept. 3	2020/4/2	¥75
Sales Dept. 3	2020/4/5	¥20

Other Use Cases

Time Tracking

Billing Management

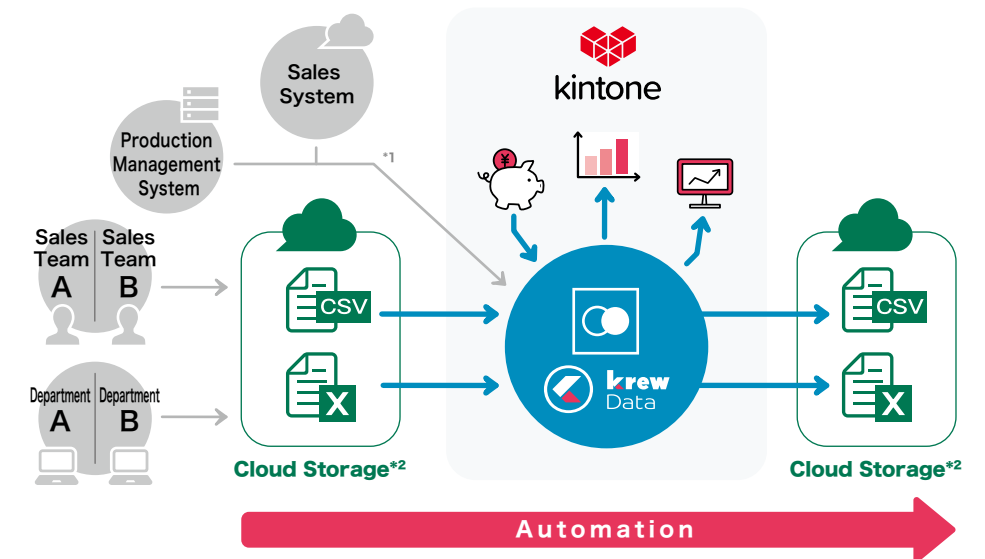

Inventory Management

External Integration

Connect External Data with Kintone

Connect external systems, SaaS applications, and file-based data to Kintone automatically. Reduce manual data entry and improve visibility across business processes. Once imported, data can be combined and analyzed alongside data already stored in Kintone, enabling a unified view across systems and teams.

Use Cases

Sync Master Data with Kintone

Import Spreadsheet-Based Data into Kintone

Send Kintone Data to Other Systems

*1 A separate subscription to CData Connect AI is required.

*2 Supported cloud storage services for file import/export: OneDrive, Box, Dropbox, Google Drive, and SharePoint
Supported file formats for import/export: CSV files, Excel spreadsheets, and Google Sheets

A data visualization plug-in for Kintone that combines powerful charts and pivot tables.

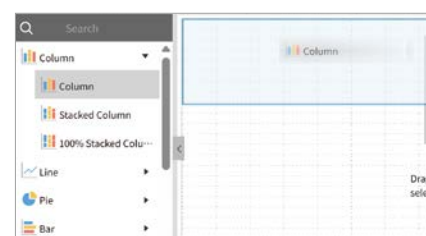

Display multiple visualizations in a single dashboard and gain real-time insight into your business data.

Available in both Standard and Simple editions to match your analytics needs.

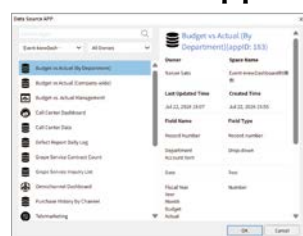

Build Dashboards in 3 Steps

1 Choose a Chart

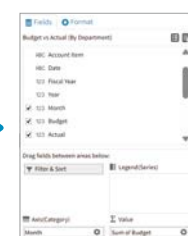

Choose and place charts using drag and drop.

2 Choose a Data Source App

Choose the app you want to visualize.

3 Select Fields

Choose the data fields you want to analyze.

More Ways to Analyze Your Data

Analyze Data Across Multiple Apps

Bring data from multiple apps together in a single dashboard.

Combo Charts

Visualize Data in Real-Time

Monitor performance and respond faster with real-time insights.

More Chart Types

- Area Charts
- Scatter & Bubble Charts
- Funnel Charts
- Radar Charts

Explore Data from Every Angle

Filter and analyze data the way you need.

Advanced Filtering & Analysis

- Drill-Through
- Cross-Filtering
- Timeline
- Drill-Down

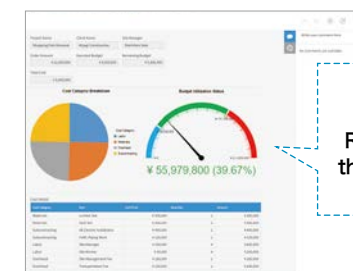

Slicers

Visualize Data Across Your Business

Display dashboards not only in Kintone list views, but also in record detail views and krewSheet views. Enable business insights at every level - from individual records to teams and management.

For Frontline Users Record Detail View

Visualize individual performance and gain actionable insights.

Analyze Data Related to the Current Record

For Executives Dashboard App

For Budget vs. Actual Analysis

Monitor business performance and uncover areas for improvement.

Analyze Overall Business Performance

For Team Leaders & Managers krewSheet View*

For Project Time Tracking

Visualize team performance and identify areas for improvement.

Aggregate Data Related to the Selected Record in krewSheet

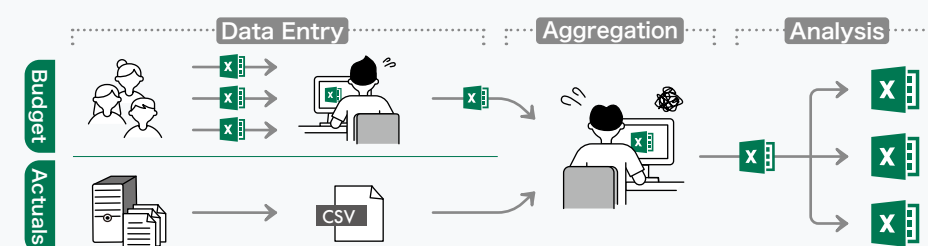

* Requires a separate krewSheet subscription

Use Cases

Move Beyond Spreadsheets for Budget-to-Actual Analysis

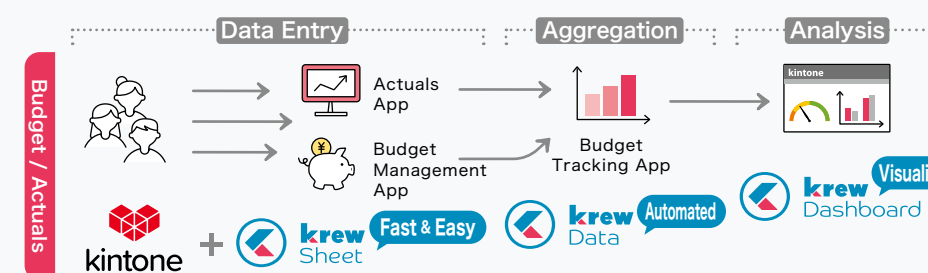

Before krew

- ▶ Budget Data Is Scattered Across Departments
- ▶ Budget and Actual Data Are Stored in Separate Systems
- ▶ Difficult to Share Insights and Collect Feedback

Benefits of krew

- ▶ Spreadsheet-Style View
- ▶ No-Code Data Aggregation Across Apps
- ▶ Scheduled Data Processing
- ▶ Advanced Data Visualization
- ▶ Unlock the Full Power of Kintone

- Data Management
- Collaboration Features
- Workflow

- Spreadsheet-Style View
- Aggregate Data Across Apps Without Customization
- Support for Scheduled Processing
- Analyze Data with Rich Visualizations

Unlock the Full Power of Kintone
